

Do you agree...?

that men and boys should NOT be allowed to 'self-identify' as women or girls and:

- ➔ Use women's changing rooms at work or in the shops.
- ➔ Provide medical or personal care when a female patient has requested a woman to provide these services.
- ➔ Access services and accommodation at women's refuges.
- ➔ Be able to play on girls' sports teams.
- ➔ Be housed in women's prisons.

Many workplaces, government bodies and schools are already allowing men to self-identify as women and use women's services - there is no need for them to have a medical diagnosis, take hormones or have any surgery.

When males are allowed to access women's spaces the results are just as you would expect - an increase in voyeurism, sexual attacks and women no longer feeling safe in using their spaces and services.

If a rapist claims to be a woman Police Scotland have said they will record his crime as a woman's crime. Violent male prisoners who self-identify as women have already been housed in the women's estate by the Scottish Prison Service.

And self-identification isn't even the law...yet!

Women have fought long and hard for our rights and we need to let the Scottish Parliament know we will not let them change laws that take away our rights, our spaces, and our services.
